

Comprehensive Topic Outlines for 20 Courses

Executive summary

This report provides comprehensive, foundational-to-advanced topic outlines for 20 courses spanning creative/agency skills, AI/tech, development, and marketing/business. Every course includes core concepts, common tools and workflows, practical projects, best practices, common pitfalls, and portfolio/assessment ideas, with a relative time estimate (low/medium/high) per topic line.

The outlines are synthesized from authoritative “spine” sources: official documentation/training ecosystems (e.g., OpenAI API and Help Center guidance on prompting, safety, and production deployment), web platform references (e.g., MDN and WHATWG), and standards/guidelines (e.g., WCAG 2.2; ISO human-centred design). ¹

Research approach and notation

Source selection prioritized primary documentation and training ecosystems from OpenAI ², Google ³ (including YouTube ⁴), Apple ⁵, Meta ⁶, TikTok ⁷, LinkedIn ⁸, HubSpot ⁹, and Upwork ¹⁰; standards and web governance guidance from World Wide Web Consortium ¹¹, WHATWG ¹², National Institute of Standards and Technology ¹³, and International Organization for Standardization ¹⁴; and professional practice resources from AIGA ¹⁵ and Freelancers Union ¹⁶. ¹⁷

Line format (applies to every course):

- Each line is a single topic (one per line), ordered from foundational → advanced.
- Each line includes **Time=low/medium/high** (relative effort).
- **Prereq=...** appears where the topic is meaningfully dependent on prior knowledge.
- **Tools=...**, **Workflow=...**, and **Output=...** are included where most relevant (projects/assessments/portfolio artifacts).
- “Best practices” and “Pitfalls” are included explicitly near the end of each course (and may also appear earlier when critical for workflow correctness or safety).

Course outlines

Video Editing — spine sources used for coverage and ordering. ¹⁸

T01 Foundations: editing goals, story intent, basic terminology (shots, sequences, continuity). Time=low | Prereq=none

T02 Tooling landscape: NLE concepts, project setup, sequence settings, shortcuts. Time=medium | Tools=NLEs | Output=setup checklist

T03 Media fundamentals: codecs/containers, frame rate, resolution, audio sample rate, proxies. Time=medium | Workflow=ingest→organize→edit→finish→deliver

T04 Ingest & organization: folder hygiene, bin structure, naming, backups, relinking. Time=medium |

Output=project template

T05 Timeline essentials: trims (ripple/roll/slip/slide), cut types, pacing basics. Time=medium | Prereq=T01–T04

T06 Story craft in edit: continuity, J/L cuts, b-roll, visual grammar, montage logic. Time=medium

T07 Audio for editors: dialogue cleanup, music beds, SFX, basic mixing, loudness targets. Time=high | Prereq=T05

T08 Color correction basics: exposure/white balance, matching shots, scopes-first mindset. Time=high | Prereq=T05

T09 Titles & captions: lower thirds, typography rules, subtitles/captions workflow. Time=medium | Output=brand title pack

T10 Motion + effects basics: keying, masking, motion tracking (intro), stabilization. Time=high | Prereq=T05

T11 Time manipulation: speed changes, time remapping, speed ramps, optical flow caveats. Time=medium | Pitfall=artifacting

T12 Multicam editing: sync strategies, angle switching, audio-first decisions. Time=high | Prereq=T05

T13 Performance workflow: caches, proxies, storage throughput, GPU settings, troubleshooting. Time=medium

T14 Collaboration basics: handoffs, sharing projects, archiving, deliverable packaging. Time=medium | Output=handoff checklist

T15 Export & delivery: masters vs publish exports, QC pass, platform-safe presets. Time=high | Prereq=T05–T10

T16 Accessibility & compliance: captions quality, flash/epilepsy considerations, privacy basics. Time=medium

T17 Best practices: consistent project templates, incremental saves, color/audio checkpoints. Time=low

T18 Portfolio Project A: 60–90s story edit (audio mix + basic grade + titles). Time=high | Output=case study

T19 Portfolio Project B: multi-format repurpose pack (16:9 + 9:16 + 1:1 exports). Time=high | Prereq=T15

T20 Common pitfalls: mixed frame rates, clipping audio, over-grading, no backups, ignoring QC. Time=low | Output=pitfall checklist

Graphic Designing — spine sources used for coverage and ordering. 19

T01 Foundations: elements/principles, hierarchy, balance, whitespace, critique vocabulary. Time=medium | Prereq=none

T02 Raster vs vector: resolution, DPI/PPI, file formats, color modes (RGB/CMYK). Time=medium

T03 Tool setup: workspaces, non-destructive mindset (layers, masks, versions). Time=medium | Tools=common design suites

T04 Typography essentials: font pairing, hierarchy, readability, alignment, spacing. Time=high | Output=type system mini-guide

T05 Color theory + accessibility: harmonies, contrast, color-blind safety, palette creation. Time=high | Output=palette set

T06 Layout systems: grids, modular scales, spacing rules, responsive layouts vs print pages. Time=high

T07 Image editing basics: crop, levels, selection tools, retouch, compositing principles. Time=high | Prereq=T02–T03

T08 Vector drawing: paths, pen tool logic, booleans, icon sets, logo construction. Time=high

T09 Branding fundamentals: identity components, tone, usage rules, brand kit concept. Time=high | Output=style guide outline

T10 Social/web assets: export settings, safe margins, template systems, batch exports. Time=medium

T11 Print production basics: bleeds, preflight, PDF export, typography for print. Time=medium

T12 Asset management: libraries, components, shared folders, naming conventions. Time=medium

T13 Collaboration workflow: feedback loops, annotations, version control for design files. Time=medium

T14 Design QA: consistency checks (type, color, spacing), accessibility checks, proofing. Time=medium
 T15 Best practices: design brief → moodboard → iterations → final specs; document decisions. Time=low
 T16 Legal basics: licensing fonts/images, usage rights, attribution norms. Time=medium
 T17 Portfolio Project A: logo + mini identity kit (palette, type, usage, mockups). Time=high | Output=case study
 T18 Portfolio Project B: campaign set (poster/flyer + 6 social creatives + variants). Time=high
 T19 Assessment: critique rubric + before/after iterations + export spec sheet. Time=medium
 T20 Common pitfalls: random fonts, low contrast, inconsistent spacing, destructive edits, no brief. Time=low

Motion Graphics — spine sources used for coverage and ordering. 20

T01 Foundations: motion principles (timing, spacing, easing), storyboards/animatics. Time=medium | Prereq=basic design
 T02 Tool chain overview: compositing app, 3D tool (optional), asset pipeline. Time=medium | Tools=AE/C4D/Blender/Lottie
 T03 Project setup: frame rates, comp sizes, safe areas, naming/versioning standards. Time=medium
 T04 Shape/vector workflows: importing vectors, shape layers, boolean ops, trim paths. Time=high
 T05 Keyframes & easing: graph editor concepts, motion blur, natural motion patterns. Time=high | Prereq=T01
 T06 Kinetic typography: readable type motion, hierarchy in time, subtitle animation. Time=high
 T07 Masks & mattes: alpha/luma mattes, roto basics, edge artifacts management. Time=high
 T08 2.5D/3D basics: cameras, lights, parallax, depth cues, DOF tradeoffs. Time=high
 T09 Tracking basics: attach graphics to footage, stabilize, manual vs assisted tracking. Time=high
 T10 Compositing fundamentals: blending modes, color correction, grain, matching plates. Time=high
 T11 Expressions intro: linking properties, loops, basic math, debugging errors. Time=high | Prereq=T05
 T12 Template thinking: reusable rigging (controllers), modular precomps, naming discipline. Time=medium
 T13 3D integration (optional): C4D/Blender scene basics, render passes, compositing. Time=high | Prereq=T10
 T14 Delivery formats: video exports, transparency/alpha workflows, GIF pitfalls, web formats. Time=medium
 T15 Lottie pipeline: constraints, export considerations, testing on target runtime. Time=high | Prereq=T04
 T16 Best practices: keep comps clean, precomp rules, performance-friendly effects. Time=low
 T17 Portfolio Project A: 8–12s logo sting + lower-third pack (3 styles). Time=high | Output=brand motion kit
 T18 Portfolio Project B: 20–30s micro-explainer with sound + captions. Time=high
 T19 Portfolio Project C: Lottie animation shipped + “limits learned” write-up. Time=high | Prereq=T15
 T20 Common pitfalls: messy timelines, overuse of effects, unreadable type, untested exports. Time=low

UI/UX Design — spine sources used for coverage and ordering. 21

T01 Foundations: UX vs UI vs product design, deliverables, success metrics. Time=low | Prereq=none
 T02 Human-centred process: plan research, design, evaluate iteratively across lifecycle. Time=medium | Prereq=none
 T03 Discovery research: stakeholder interviews, user interviews, surveys, desk research. Time=high | Output=research plan
 T04 Synthesis: personas, JTBD/hypotheses, problem statements, opportunity mapping. Time=high | Prereq=T03
 T05 Information architecture: content inventory, sitemaps, navigation models, card sorting. Time=high
 T06 Interaction design: user flows, task flows, edge cases, error states, microinteractions. Time=high
 T07 Wireframing: low-fi layouts, responsive patterns, prioritization, annotation. Time=medium
 T08 UI foundations: typography, spacing systems, color/contrast, consistency patterns. Time=high |

Prereq=T07

T09 Platform guidance: designing within ecosystem conventions (Apple-style + Material-style). Time=medium | Prereq=T08

T10 Design systems: components, variants, tokens, naming, documentation, governance. Time=high

T11 Prototyping: interactive flows, transitions, stateful components, accessible prototypes. Time=high | Prereq=T06

T12 Heuristic evaluation: apply usability heuristics; write actionable findings. Time=medium | Output=heuristic report

T13 Usability testing: test plan, scripts, moderation, analysis, prioritization. Time=high | Prereq=T11

T14 Accessibility: WCAG principles, touch targets, keyboard flow, contrast, content. Time=high | Prereq=T08

T15 Handoff: specs, redlines, assets, design tokens, dev Q&A workflow. Time=medium

T16 Product analytics thinking: event taxonomy, funnels, iteration loops (non-tool-specific). Time=medium

T17 Best practices: design with states (loading/empty/error), edge cases, hierarchy clarity. Time=low

T18 Portfolio Project A: end-to-end redesign case study (research → prototype → test). Time=high | Output=portfolio case

T19 Portfolio Project B: mini design system + documentation + sample screens. Time=high | Prereq=T10

T20 Common pitfalls: skipping research, weak IA, inconsistent components, ignoring accessibility. Time=low

Thumbnail Designing — spine sources used for coverage and ordering. 22

T01 Foundations: thumbnail purpose, attention economics, “small-size readability” constraints. Time=low | Prereq=basic design

T02 Research workflow: audience intent, competitor scan, style patterns, brand constraints. Time=medium | Output=swipe file

T03 Composition basics: hierarchy, subject isolation, rule of thirds, negative space. Time=medium

T04 Typography for thumbnails: minimal words, thick strokes, mobile legibility tests. Time=high

T05 Color & contrast: high-contrast palettes, consistent grading, color-blind checks. Time=high

T06 Image sourcing: frame selection, staged shots, emotion clarity, story-in-one-frame. Time=medium

T07 Cutouts/masking: clean edges, hair detail strategies, shadow/outline consistency. Time=high

T08 Depth & separation: background blur, rim light, gradients, focus funnel. Time=medium

T09 Consistency system: templates, safe zones, repeated motifs, “series” branding. Time=medium | Output=template kit

T10 Metadata alignment: title–thumbnail promise match; avoid deceptive framing. Time=medium

T11 Compliance basics: prohibited imagery, community/policy alignment, risk flags. Time=medium

T12 Export discipline: file formats, file size constraints, compression without artifacts. Time=medium

T13 Workflow: brief → draft 3 concepts → pick winner → finalize → export → upload. Time=medium

T14 Iteration loop: refresh old thumbnails; log changes; compare performance over time. Time=medium | Output=iteration log

T15 Best practices: one focal point, 1–3 colors, consistent type, test at 10% zoom. Time=low

T16 Portfolio Project A: 10-thumbnail set for one niche + rationale per design. Time=high | Output=case study

T17 Portfolio Project B: “thumbnail style guide” (rules + templates + do/don’t). Time=high

T18 Assessment: blind review rubric + legibility test + policy checklist. Time=medium

T19 Advanced: scalable production (batching, reusable assets), speed vs quality tradeoffs. Time=medium

T20 Common pitfalls: clutter, tiny text, misleading visuals, inconsistent branding, no testing. Time=low

Social Media Content Creation — spine sources used for coverage and ordering. 23

T01 Foundations: objectives (awareness/leads/sales), platform format landscape, audience fit. Time=low |

Prereq=none

T02 Content strategy: niche, pillars, messaging, brand voice, creative constraints. Time=medium | Output=content pillars doc

T03 Planning: ideation, scripting, storyboarding, shot lists, production calendar. Time=medium

T04 Capture basics: lighting, audio, framing, b-roll, vertical vs horizontal decisions. Time=medium

T05 Editing for social: hooks, pacing, captions, safe zones, repurposing strategy. Time=high | Prereq=T04

T06 Trend intelligence: hashtags/sounds/creator patterns and when to use/avoid. Time=medium

T07 Publishing workflow: scheduling, metadata, thumbnails/covers, CTA placement. Time=medium

T08 Community ops: comment moderation, DM handling, escalation rules, tone consistency. Time=medium

T09 Analytics basics: retention, CTR, watch time, engagement, cohort comparisons. Time=high | Output=metrics dashboard spec

T10 Iteration loop: hypothesis → variant → measure → learn → standardize. Time=high

T11 Collaboration with clients/brands: approvals, briefs, deliverables, revision limits. Time=medium

T12 Legal & compliance: music rights, disclosure (ads/affiliates), privacy/consent. Time=medium

T13 Content accessibility: captions, readable overlays, contrast, pacing for comprehension. Time=medium

T14 Paid vs organic thinking: when to boost, creative-as-test, messaging experiments. Time=medium

T15 Best practices: batch production, templating, consistent naming, weekly review cadence. Time=low

T16 AI assist (optional): ideation, scripting, hooks, captions—plus verification discipline. Time=medium

T17 Portfolio Project A: 30-day calendar + 10 shipped assets across 3 formats. Time=high | Output=case study

T18 Portfolio Project B: 3-ad creative set (3 hooks × 2 edits each) + analytics plan. Time=high

T19 Assessment: rubric (hook clarity, brand fit, accessibility, metrics plan) + peer review. Time=medium

T20 Common pitfalls: inconsistent posting, ignoring analytics, weak hooks, copyright strikes, no process. Time=low

Generative AI — spine sources used for coverage and ordering. 24

T01 Foundations: what “generative” means (text/image/audio), typical capabilities/limits. Time=low | Prereq=none

T02 Core concepts: tokens, context window, embeddings, training vs inference basics. Time=medium

T03 Model selection factors: cost/latency/quality tradeoffs; constraints-first mindset. Time=medium

T04 Risk & responsibility: AI risk framing, trustworthiness, governance basics. Time=medium

T05 Data privacy & compliance: sensitive data handling, retention assumptions, red lines. Time=medium

T06 Core use cases: drafting, summarization, extraction, classification, ideation, code assist. Time=medium

T07 Grounding & RAG: retrieval concepts, citations, source-of-truth patterns. Time=high | Prereq=T02

T08 Evaluation basics: gold sets, rubrics, human review, regression tests. Time=high

T09 Prompting as control: instruction hierarchy, constraints, formatting, examples. Time=medium

T10 Structured outputs: schemas, validators, parsing errors, fallback strategies. Time=high

T11 Tool use & agents: tool calling, orchestration, guardrails, approvals. Time=high | Prereq=T09–T10

T12 Security: prompt injection, data exfiltration scenarios, safe input handling. Time=high

T13 Monitoring: logs, quality metrics, drift awareness, incident playbooks. Time=medium

T14 Cost optimization: caching, batching, truncation, retrieval sizing. Time=high

T15 Multimodal basics: image+text analysis workflows, limitations, red-team cases. Time=medium

T16 “Build vs buy” thinking: when to use hosted tools vs API integration. Time=medium

T17 Best practices: cite sources, constrain inputs/outputs, test adversarially, keep humans in loop. Time=low

T18 Portfolio Project A: mini RAG assistant on a small corpus + eval report. Time=high | Output=repo + write-up

T19 Portfolio Project B: content variant generator + A/B plan + safety checklist. Time=high
T20 Common pitfalls: hallucinated facts, no eval set, leaking secrets, brittle parsing. Time=low

AI & Machine Learning Basics — spine sources used for coverage and ordering. 25

T01 Prereqs: basic Python, algebra, descriptive stats, spreadsheet-level data comfort. Time=medium
T02 ML workflow overview: define task → collect data → train → evaluate → iterate. Time=medium
T03 Data splitting: train/validation/test, leakage, stratification, baselines. Time=high
T04 Feature basics: scaling, encoding categories, missing values, pipelines. Time=high
T05 Supervised learning: regression vs classification; when to use each. Time=medium
T06 Metrics & scoring: accuracy vs precision/recall, ROC-AUC, MAE/MSE, calibration. Time=high
T07 Cross-validation & tuning: validation strategy, grid/random search, overfitting control. Time=high
T08 Unsupervised learning: clustering, dimensionality reduction, anomaly detection (overview). Time=medium
T09 Bias-variance + regularization: under/overfitting, model complexity intuition. Time=high
T10 Neural nets intro: layers/activations, loss functions, basic training loop concepts. Time=high
T11 Deep learning overview: CNN/RNN/transformers concepts and where they fit. Time=medium
T12 Data pipelines: batching, shuffling, dataset building, reproducibility. Time=medium
T13 Practical experimentation: notebooks, random seeds, tracking changes, learning curves. Time=medium
T14 Error analysis: confusion matrix reviews, slice analysis, “where it fails” thinking. Time=high
T15 Ethics & risk: fairness, privacy, and practical risk framing in ML projects. Time=medium
T16 Best practices: start simple, baseline first, validate data, document assumptions. Time=low
T17 Project A: supervised model + metric report + error analysis notebook. Time=high | Output=report
T18 Project B: simple neural net classification + training curves + evaluation. Time=high
T19 Portfolio: “model card” + reproducible pipeline + README with metrics. Time=high
T20 Common pitfalls: leakage, wrong metric, overfitting, no baseline, irreproducible runs. Time=low

AI Automation (No-code tools like Zapier, Make) — spine sources used for coverage and ordering. 26

T01 Foundations: automation mindset, process mapping, triggers/actions mental model. Time=low | Prereq=basic spreadsheets
T02 Scoping automations: define inputs/outputs, success criteria, failure modes. Time=medium
T03 Build-first automation: single trigger → single action; validate end-to-end. Time=medium | Output=working “hello automation”
T04 Multi-step flows: multiple actions, data mapping, field hygiene, normalization. Time=high
T05 Conditional logic: filters, if/else branches, routing rules, guard conditions. Time=high | Prereq=T03-T04
T06 Data transformation: formatters, parsing JSON/text, dedupe, enrichment. Time=high
T07 Webhooks: inbound/outbound webhooks, payload design, testing with sample requests. Time=high
T08 Auth & access: OAuth, API keys, least-privilege connections, secret storage basics. Time=medium
T09 Reliability: retries, idempotency, rate limits, scheduling vs instant triggers. Time=high
T10 Error handling: alerts, dead-letter queues (concept), manual review steps. Time=high
T11 Logging & monitoring: execution logs, dashboards, SLA thinking. Time=medium
T12 Human-in-the-loop: approval steps, exception handling, audit trails. Time=medium
T13 AI-augmented automations: call AI endpoints, parse outputs, validate structured results. Time=high | Prereq=T06
T14 Security & privacy: PII handling, access rotation, vendor risk awareness. Time=medium
T15 Documentation: SOPs, runbooks, change management, client handoff pack. Time=medium | Output=automation playbook
T16 Best practices: start small, name steps, store raw inputs, add validation early. Time=low

T17 Project A: lead intake → CRM → notification → follow-up sequence automation. Time=high | Output=demo + SOP

T18 Project B: content pipeline: intake → summarize → tag → publish queue. Time=high

T19 Assessment: reliability checklist + monitoring plan + test cases for edge inputs. Time=medium

T20 Common pitfalls: brittle parsing, silent failures, scope creep, permission sprawl, no logs. Time=low

Prompt Engineering — spine sources used for coverage and ordering. 27

T01 Foundations: why prompts matter; nondeterminism; controllable vs uncontrollable factors. Time=low | Prereq=none

T02 Prompt anatomy: roles/instructions/context/examples/output specification. Time=medium

T03 Clarity techniques: explicit constraints, delimiters, “do/don’t”, success criteria. Time=high

T04 Few-shot prompting: choosing examples, coverage of edge cases, avoiding leakage. Time=high

T05 Structured outputs: JSON schemas, validation rules, re-ask loops, error recovery. Time=high

T06 Iteration loop: draft → test → analyze failures → refine; prompt versioning. Time=medium

T07 Context management: summarization, chunking, retrieval, “what to include” heuristics. Time=high

T08 Tool calling patterns: function schemas, tool selection gates, safe argument shaping. Time=high

T09 Evaluation: test sets, rubrics, regression checks, “prompt unit tests”. Time=high

T10 Safety: prompt injection attacks, untrusted inputs, output constraints. Time=high

T11 Domain grounding: requiring citations, extracting facts from provided sources only. Time=medium

T12 Parameter awareness: temperature/top-p/max tokens; when to control for determinism. Time=medium

T13 Prompt libraries: reusable templates, style guides, team conventions. Time=medium | Output=prompt catalog

T14 Troubleshooting: hallucinations, verbosity, refusal patterns, format drift. Time=medium

T15 Advanced patterns: self-checks, multi-pass extraction, critique/repair loops. Time=high

T16 Best practices: measure improvements, keep prompts short but specific, validate outputs. Time=low

T17 Project A: build 5 prompts (summarize/extract/classify/draft/QA) + eval report. Time=high

T18 Project B: extraction pipeline producing strict JSON + validator + fallback. Time=high

T19 Assessment: red-team prompts + security checklist + failure-mode write-up. Time=medium

T20 Common pitfalls: vague asks, no examples, no validation, trusting tool outputs blindly. Time=low

ChatGPT & AI Tools Mastery — spine sources used for coverage and ordering. 28

T01 Foundations: capability overview, when to use chat vs API vs automations. Time=low | Prereq=none

T02 Privacy & workspace basics: data handling norms, team/workspace concepts (high-level). Time=medium

T03 Prompting essentials: structuring requests, context, constraints, explicit outputs. Time=medium

T04 Custom Instructions: consistent preferences, style rules, reusable constraints. Time=medium | Output=personal instruction doc

T05 Creating GPTs: defining purpose, instructions, knowledge sources, tool permissions. Time=high

T06 Publishing & governance: testing, versioning, distribution decisions, maintenance plan. Time=high

T07 Tool use patterns: browsing/file analysis/actions—choosing the safest minimal toolset. Time=medium

T08 Safety & policy: prohibited uses, safe deployment practices, moderation concepts. Time=high

T09 Agent risks: prompt injection and untrusted inputs; mitigation patterns. Time=high

T10 Prompt libraries: reusable templates, checklists, evaluation prompts. Time=medium

T11 Structured outputs: JSON-first workflows, validators, retry rules. Time=high

T12 Integrations: connect ChatGPT to external services via actions/APIs (concept + governance). Time=high

T13 Operational basics: logging outputs, error triage, user feedback loops. Time=medium

T14 Cost/latency awareness (conceptual): scope outputs; avoid unnecessary calls. Time=medium

T15 API intro: keys, quickstart patterns, separating dev/prod, environment variables. Time=high

T16 Best practices: do not paste secrets, keep scope narrow, cite sources, test edge cases. Time=low
T17 Project A: build a “knowledge GPT” (FAQ assistant) + test suite + safety checklist. Time=high | Output=demo
T18 Project B: build a “content ops GPT” (scripts, captions, variants) + workflow SOP. Time=high
T19 Assessment: rubric-based evaluation of outputs + failure-mode report. Time=medium
T20 Common pitfalls: leaking private data, weak instructions, no tests, over-trusting outputs. Time=low

Web Development (Frontend + Backend) — spine sources used for coverage and ordering. 29

T01 Foundations: how the web works; client/server; basic dev environment setup. Time=medium | Prereq=none
T02 HTML semantics: structure, forms, accessibility roles, document outlines. Time=high
T03 CSS fundamentals: layout (flex/grid), responsive design, typography basics. Time=high
T04 JavaScript fundamentals: syntax, DOM, events, async basics. Time=high
T05 Tooling: package managers, bundlers, dev server, environment variables. Time=medium
T06 HTTP basics: methods, status codes, headers, caching concepts, CORS overview. Time=high
T07 Frontend architecture: component thinking, state, routing (framework-agnostic). Time=medium
T08 Accessibility & UX: keyboard navigation, ARIA basics, responsive constraints. Time=high
T09 Performance basics: image optimization, minimizing render-blocking, caching. Time=medium
T10 Backend fundamentals: routing/controllers, templates vs APIs, middleware thinking. Time=high
T11 Databases: SQL concepts, schema design, migrations (high-level). Time=high
T12 API design: REST patterns, pagination, errors, versioning, documentation. Time=high
T13 Auth basics: sessions/cookies, JWT concepts, password hashing principles. Time=high
T14 Security basics: input validation, least privilege, secure headers, dependency hygiene. Time=high
T15 Testing: unit tests, integration tests, API tests; testable architecture. Time=high
T16 Deployment: hosting, domains/TLS basics, CI/CD concepts. Time=medium
T17 Best practices: consistent code style, docs-first APIs, incremental refactors, logs. Time=low
T18 Project A: CRUD web app (frontend + backend + DB) with auth + tests. Time=high | Output=deployed app
T19 Project B: third-party API integration + caching + monitoring checklist. Time=high
T20 Common pitfalls: tangled state, no validation, poor error handling, insecure auth, no tests. Time=low

Python Programming — spine sources used for coverage and ordering. 30

T01 Setup: interpreter, IDE, virtual environments concept, running scripts. Time=medium | Prereq=none
T02 Syntax basics: variables, types, operators, strings, f-strings. Time=medium
T03 Control flow: if/elif/else, loops, comprehensions, truthiness. Time=high
T04 Functions: parameters, return values, scope, docstrings. Time=high
T05 Data structures: list/dict/set/tuple patterns; common algorithms (search/sort basics). Time=high
T06 Files & data: reading/writing files, JSON, CSV patterns, encoding pitfalls. Time=high
T07 Errors & exceptions: try/except, custom exceptions, context managers. Time=high
T08 Modules/packages: imports, project structure, reusable modules. Time=medium
T09 OOP basics: classes, methods, dataclasses (conceptual), composition over inheritance. Time=high
T10 Testing with pytest: test structure, assertions, fixtures, parametrization basics. Time=high
T11 Code style: PEP 8 conventions, readability, naming, formatting discipline. Time=medium
T12 Dependency management: pip usage, requirements, installer basics. Time=medium
T13 Packaging basics: installable packages, entry points (concept), distribution overview. Time=medium
T14 Standard library leverage: pathlib, datetime, collections, itertools (survey). Time=high
T15 Automation scripting: CLI args, environment variables, logging basics. Time=high

T16 Concurrency overview: threads vs async (conceptual entry point). Time=medium
T17 Best practices: write tests early, type/edge-case thinking, isolate side effects. Time=low
T18 Project A: CLI utility (e.g., file organizer) + tests + packaging basics. Time=high | Output=repo
T19 Project B: data processing pipeline (CSV→report) + test suite + docs. Time=high
T20 Common pitfalls: global state, no tests, tangled dependencies, mixing envs, weak error handling. Time=low

Full Stack Development — spine sources used for coverage and ordering. 31

T01 Foundations: full-stack architecture; responsibilities across frontend/backend/DB. Time=medium | Prereq=web dev basics
T02 API contracts: design-first with OpenAPI; errors, versioning, docs generation. Time=high
T03 Database design: schemas, normalization, indexing fundamentals, migrations. Time=high | Prereq=T01
T04 Auth at scale: RBAC, permissions, session strategy, OAuth concepts. Time=high
T05 Frontend integration: API clients, state synchronization, caching, optimistic updates. Time=high
T06 Background jobs: queues, scheduled tasks, async processing patterns (conceptual). Time=medium
T07 Observability: structured logs, metrics, tracing basics, incident response thinking. Time=high
T08 CI/CD: automated tests, build steps, deployment pipelines, rollback plans. Time=high
T09 Containers: images, local dev parity, Compose stacks, health checks. Time=high
T10 Environment management: configs, secrets, dev/stage/prod separation. Time=high
T11 Performance: caching layers, DB query optimization, CDN basics, pagination. Time=high
T12 Security hardening: dependency scanning mindset, least privilege, secure defaults. Time=high
T13 Data management: backups, restores, retention policies (conceptual). Time=medium
T14 Documentation: runbooks, onboarding docs, API docs, architecture diagrams. Time=medium
T15 Collaboration: code reviews, branching strategy, issue tracking, release notes. Time=medium
T16 Best practices: treat API contract as product; automate checks; document assumptions. Time=low
T17 Capstone A: end-to-end app with API docs + DB + deployment + monitoring checklist. Time=high | Output=live demo
T18 Capstone B: add CI/CD + docker-compose local stack + backup/rollback plan. Time=high
T19 Portfolio: README + OpenAPI spec + architecture diagram + test coverage summary. Time=high
T20 Common pitfalls: unclear schemas, brittle migrations, secrets in repo, no monitoring, no rollback. Time=low

App Development (Basic) — spine sources used for coverage and ordering. 32

T01 Platform choices: native vs cross-platform; constraints; “basic app” scope definition. Time=medium | Prereq=basic programming
T02 Environment setup: SDKs, emulators/simulators, project templates, debugging basics. Time=medium
T03 UI building blocks: layout primitives, components/widgets, adaptive UI principles. Time=high
T04 Navigation: screens, routes, tab stacks, deep links (conceptual). Time=high
T05 State management basics: local state vs app state; predictable data flow. Time=high
T06 Data storage: preferences, local DB concepts, caching; offline-first basics. Time=high
T07 Networking: REST requests, JSON parsing, error handling, loading states. Time=high
T08 Permissions/privacy: runtime permissions, data minimization, user consent patterns. Time=medium
T09 Accessibility: dynamic type/font scaling, contrast, semantics, touch targets. Time=medium
T10 Testing: basic unit tests + UI tests (conceptual intro + habit formation). Time=medium
T11 Debugging/profiling: logs, crash triage, performance hotspots. Time=medium
T12 Build & release: signing, build variants, store listing basics, versioning. Time=medium
T13 Notifications overview: push vs local notifications; user experience pitfalls. Time=medium

T14 Payments/ads basics: high-level monetization options and UX constraints. Time=low
 T15 Security basics: secure storage patterns, network security, sensitive data handling. Time=high
 T16 Best practices: keep screens small, handle offline/errors, document navigation flows. Time=low
 T17 Project A: basic CRUD app (create/read/update/delete) with local storage. Time=high | Output=demo app
 T18 Project B: API-integrated app with caching + robust error/loading states. Time=high
 T19 Portfolio: screenshots + short demo video + “decisions” write-up. Time=medium
 T20 Common pitfalls: messy state, no offline story, ignoring permissions, weak error handling. Time=low

Digital Marketing — spine sources used for coverage and ordering. 33

T01 Foundations: core channels, funnels, customer journey, outcomes vs vanity metrics. Time=medium | Prereq=none
 T02 Strategy: goals, KPIs, audience/segments, positioning, messaging hierarchy. Time=high | Output=marketing brief
 T03 Content marketing: value props, editorial planning, lead magnets, distribution. Time=high
 T04 Website/landing pages: conversion basics, forms, CTA, trust signals. Time=high
 T05 Search ads overview: intent match, keyword structure, ad relevance principles. Time=high
 T06 Social ads overview: objectives, audiences, creatives, measurement loops. Time=high
 T07 Email marketing: lists, segmentation, lifecycle automation (conceptual). Time=high
 T08 Analytics fundamentals: GA4 structure, events, conversions, attribution basics. Time=high
 T09 Measurement discipline: UTMs, naming conventions, dashboards, reporting cadence. Time=medium
 T10 Budgeting: channel allocation, marginal ROI thinking, test budgets. Time=medium
 T11 Creative strategy: hooks, storytelling, offer design; creative briefs. Time=high
 T12 Experimentation: A/B testing basics, iteration cycles, learning agendas. Time=high
 T13 Platform learning paths: certifications and structured practice routines. Time=medium
 T14 Operations: SOPs, asset management, approvals, compliance checks. Time=medium
 T15 Privacy/compliance basics: consent, cookies, data handling (high-level). Time=medium
 T16 Best practices: start with clear KPIs; measure end-to-end; prioritize repeatable tests. Time=low
 T17 Project A: full digital marketing plan (channels, KPIs, budgets, content calendar). Time=high | Output=plan doc
 T18 Project B: campaign measurement framework (UTMs + GA4 events + report template). Time=high
 T19 Portfolio: case study format + dashboard screenshots + “what I learned” section. Time=medium
 T20 Common pitfalls: no tracking plan, random tactics, misaligned KPIs, poor creative testing. Time=low

SEO — spine sources used for coverage and ordering. 34

T01 Search fundamentals: crawling, indexing, ranking (conceptual), search intent. Time=medium | Prereq=basic web
 T02 Search guidelines: what search engines expect; avoiding manipulative tactics. Time=medium
 T03 Keyword research: topic clusters, intent mapping, avoiding “keyword stuffing”. Time=high
 T04 On-page SEO: titles, headings, internal links, content structure, semantic HTML. Time=high
 T05 Technical SEO: sitemaps, robots directives, canonicalization basics. Time=high
 T06 Site architecture: IA for crawl + users; faceted navigation risks. Time=high
 T07 Performance basics: page speed, image optimization, caching concepts. Time=high
 T08 Structured data: schema vocabulary, eligibility concepts, validation mindset. Time=high
 T09 Content strategy: topical coverage, editorial maintenance, content refresh cycles. Time=high
 T10 International/mobile: mobile-first thinking, multilingual basics (conceptual). Time=medium
 T11 Off-site factors: links as signals (high-level), digital PR mindset, risk awareness. Time=medium

T12 Tooling: Search Console workflow, query analysis, coverage issues, inspections. Time=high
 T13 SEO audits: technical checklist, prioritization, fix validation, regression checks. Time=high
 T14 Reporting: KPI selection (impressions/clicks/rankings/conversions), annotation discipline. Time=medium
 T15 Best practices: build for users, validate with tools, document changes and outcomes. Time=low
 T16 Project A: keyword map + on-page updates for 5 pages + expected impact notes. Time=high | Output=audit report
 T17 Project B: technical audit (sitemap/robots/canonical/performance) + fix backlog. Time=high
 T18 Portfolio: SEO case study with baseline→change→result narrative (with caveats). Time=medium
 T19 Assessment: “find issues” test + propose fixes + communicate tradeoffs to stakeholders. Time=medium
 T20 Common pitfalls: thin content, broken canonicals, ignoring indexing, poor internal linking. Time=low

Social Media Marketing — spine sources used for coverage and ordering. 35

T01 Foundations: choose platforms by audience + objective; define success metrics. Time=medium | Prereq=none
 T02 Strategy: content pillars, brand voice, community plan, calendar system. Time=high
 T03 Organic execution: posting cadence, storytelling formats, engagement routines. Time=high
 T04 Creative production pipeline: briefs, scripting, filming, editing, approvals. Time=high
 T05 Paid social basics: ad formats, objectives, creative specs, compliance. Time=high
 T06 Targeting: core audiences, retargeting concepts, exclusions, geo/device basics. Time=high
 T07 Tracking & measurement: pixels/events, UTMs, attribution caveats. Time=high
 T08 Creative testing: A/B tests, controlled variables, learning agendas, iteration loops. Time=high
 T09 Reporting: dashboards, weekly insights, decision-making from results. Time=medium
 T10 Platform governance: access control, business managers, roles, audit trails. Time=medium
 T11 Community + brand safety: moderation, replies, escalation, crisis basics. Time=medium
 T12 Influencers/creators: briefs, deliverables, tracking, disclosure basics. Time=medium
 T13 Social commerce overview: creators/shops/affiliate structures (high-level). Time=medium
 T14 Best practices: refresh creatives regularly, track learnings, systemize approvals. Time=low
 T15 Project A: 30-day content calendar + community SOP + KPI dashboard template. Time=high | Output=playbook
 T16 Project B: paid campaign plan (3 creatives × 2 audiences × 1 objective) + measurement. Time=high
 T17 Portfolio: case study with creative rationale, targeting, and results interpretation. Time=medium
 T18 Assessment: ad creative checklist + policy check + reporting walkthrough. Time=medium
 T19 Advanced: multi-platform repurposing strategy + difference in intent per platform. Time=medium
 T20 Common pitfalls: chasing trends blindly, no tracking, inconsistent branding, no testing. Time=low

Freelancing & Personal Branding — spine sources used for coverage and ordering. 36

T01 Positioning: pick niche, define outcomes, craft service menu and differentiator. Time=high | Prereq=some skill to sell
 T02 Personal brand basics: narrative, credibility signals, consistent messaging. Time=medium
 T03 Portfolio building: case study structure (problem→process→result), proof artifacts. Time=high | Output=portfolio template
 T04 Profile optimization: headline, about section, featured work, credibility-first profile. Time=medium | Output=profile checklist
 T05 Lead generation (inbound): content, SEO, referrals, community presence. Time=high
 T06 Lead generation (outbound): targeting list, outreach scripts, follow-up cadence. Time=high
 T07 Sales process: discovery calls, qualification, scope clarification, next-step control. Time=high

T08 Pricing: hourly vs fixed vs retainer; rate setting frameworks; negotiation basics. Time=high
T09 Proposals: scope, deliverables, timeline, revision limits, assumptions, exclusions. Time=high |
Output=proposal template
T10 Contracts: core clauses, IP terms, payment terms, change orders; contract tooling. Time=high
T11 Payments & invoicing: milestones, deposits, payment schedules, late fees (conceptual). Time=medium
T12 Client operations: kickoff, meeting cadence, status updates, stakeholder management. Time=medium
T13 Managing revisions: feedback collection, versioning, sign-offs, conflict prevention. Time=medium
T14 Project management: personal capacity planning, time tracking, handoff artifacts. Time=medium
T15 Quality & delivery: checklists, final QA, packaging deliverables, archiving. Time=medium
T16 Best practices: document everything; set boundaries; confirm scope in writing. Time=low
T17 Project A: full personal brand kit (portfolio site outline + profile revamp + media kit). Time=high |
Output=kit
T18 Project B: 3 proposals + 2 contract templates + pricing sheet + onboarding checklist. Time=high
T19 Assessment: mock sales call + proposal review + contract risk review checklist. Time=medium
T20 Common pitfalls: vague scope, underpricing, no contract, unpaid revisions, poor follow-up. Time=low

Agency Building & Client Acquisition — spine sources used for coverage and ordering. 37

T01 Agency models: productized services, retainers, project work; selecting a focus. Time=medium |
Prereq=deliverable skill
T02 Offer design: ICP, value proposition, guaranteed outcomes vs deliverables. Time=high
T03 Packaging services: scope boundaries, tiers, add-ons, SLAs, pricing logic. Time=high
T04 Operations: intake → kickoff → production → review → delivery → reporting workflow. Time=high |
Output=process map
T05 Team & roles: account management, delivery, QA, creative, tech, sales ops. Time=medium
T06 Systems: SOPs, templates, brand kits, QA checklists, documentation culture. Time=high
T07 Sales pipeline: pipeline stages, qualification criteria, forecasting basics. Time=high
T08 Lead channels: outbound, inbound, referrals, partners, directories, events. Time=high
T09 Partnerships: platform partner programs (requirements, benefits, responsibilities). Time=medium
T10 Onboarding at scale: access requests, assets, measurement setup, expectations. Time=high
T11 Delivery quality control: review gates, escalation paths, scope change handling. Time=high
T12 Reporting: KPIs per client, cadence, QBR structure, “insights not charts” discipline. Time=high
T13 Financial basics: utilization, margins, cash flow buffer, churn risk awareness. Time=medium
T14 Client retention: renewals, expansion, satisfaction tracking, proactive comms. Time=high
T15 Governance: permissions, security, data access, ad/policy compliance. Time=medium
T16 Best practices: sell outcomes, not tasks; systemize delivery; protect capacity. Time=low
T17 Project A: agency playbook (SOPs + templates + checklists + onboarding pack). Time=high |
Output=playbook
T18 Project B: acquisition system (ICP + outreach sequences + landing page + pipeline). Time=high
T19 Portfolio: 3 case studies + proof assets + partner badges plan (if applicable). Time=medium
T20 Common pitfalls: selling custom everything, weak scope control, no pipeline hygiene, undercharging.
Time=low

Course topic counts

The table counts only the **T01–T20** topic lines per course (excluding the single-line course label).

Course	Topic lines
Video Editing	20
Graphic Designing	20
Motion Graphics	20
UI/UX Design	20
Thumbnail Designing	20
Social Media Content Creation	20
Generative AI	20
AI & Machine Learning Basics	20
AI Automation (No-code tools like Zapier, Make)	20
Prompt Engineering	20
ChatGPT & AI Tools Mastery	20
Web Development (Frontend + Backend)	20
Python Programming	20
Full Stack Development	20
App Development (Basic)	20
Digital Marketing	20
SEO	20
Social Media Marketing	20
Freelancing & Personal Branding	20
Agency Building & Client Acquisition	20

Total topic lines across all courses: **400**.

Suggested learning timelines

```

timeline
  title Video Editing
  Foundations : Goals + setup + media basics
  Core Editing : Trims + pacing + audio
  Finishing : Color + titles + effects
  Delivery : Export + QC + formats
  Portfolio : Two capstone edits

```

```
timeline
  title Graphic Designing
  Foundations : Principles + files + tools
  Core Skills : Typography + color + layout
  Production : Branding + print/web exports
  Collaboration : QA + feedback loops
  Portfolio : Identity + campaign set
```

```
timeline
  title Motion Graphics
  Foundations : Principles + comp setup
  Core Motion : Keyframes + type motion
  Compositing : Masks + tracking + polish
  Delivery : Render formats + optimization
  Portfolio : Logo sting + explainer + Lottie
```

```
timeline
  title UI/UX Design
  Discovery : Research + synthesis
  Structure : IA + flows + wireframes
  UI System : Visuals + components
  Validate : Prototypes + tests + accessibility
  Portfolio : Case study + design system
```

```
timeline
  title Thumbnail Designing
  Foundations : Purpose + research
  Craft : Composition + type + contrast
  System : Templates + consistency
  Compliance : Policy alignment
  Portfolio : 10-pack + style guide
```

```
timeline
  title Social Media Content Creation
  Strategy : Pillars + planning
  Production : Capture + edits + hooks
  Publish : Calendar + metadata
  Improve : Analytics + iteration
  Portfolio : 30-day plan + ad set
```

```
timeline
  title Generative AI
  Foundations : Concepts + capabilities
  Build : Prompting + structure
  Ground : RAG + evaluation
  Secure : Safety + monitoring
  Portfolio : RAG mini-assistant + report
```

```
timeline
  title AI & Machine Learning Basics
  Foundations : Data + workflow
  Classical ML : Models + metrics
  Deep Learning : NN basics
  Practice : Error analysis + reproducibility
  Portfolio : Two projects + model card
```

```
timeline
  title AI Automation
  Foundations : Triggers + actions
  Build : Multi-step + conditions
  Integrate : Webhooks + auth
  Operate : Monitoring + reliability
  Portfolio : Lead + content automations
```

```
timeline
  title Prompt Engineering
  Foundations : Anatomy + clarity
  Control : Few-shot + structure
  Evaluate : Test sets + regressions
  Secure : Injection defenses
  Portfolio : JSON extraction pipeline
```

```
timeline
  title ChatGPT & AI Tools Mastery
  Foundations : Prompting + workflows
  Build GPTs : Instructions + knowledge
  Govern : Safety + policy + privacy
  Integrate : Actions + API basics
  Portfolio : Two GPT-based solutions
```

```
timeline
  title Web Development
  Frontend : HTML + CSS + JS
  Web Basics : HTTP + tooling
  Backend : Routing + DB + APIs
  Quality : Security + testing
  Portfolio : CRUD app + integration
```

```
timeline
  title Python Programming
  Foundations : Syntax + control flow
  Core Skills : Data + functions + modules
  Quality : Testing + style + packaging
  Applied : Automation scripts
  Portfolio : CLI + data pipeline
```

```
timeline
  title Full Stack Development
  Architecture : Contracts + DB design
  Build : Auth + integration
  Operate : Observability + CI/CD
  Ship : Containers + deployments
  Portfolio : End-to-end capstone
```

```
timeline
  title App Development
  Setup : Platform + tooling
  Build UI : Layout + navigation + state
  Data : Storage + networking
  Ship : Testing + release basics
  Portfolio : Two basic apps
```

```
timeline
  title Digital Marketing
  Strategy : Goals + KPIs + journey
  Channels : Content + ads + email
  Measurement : GA4 + reporting
  Optimize : Experiments + budgets
  Portfolio : Plan + dashboard
```

```
timeline
  title SEO
  Foundations : Intent + guidelines
  On-page : Content + structure
  Technical : Crawl + performance
  Measure : Search Console workflows
  Portfolio : Audit + case study
```

```
timeline
  title Social Media Marketing
  Strategy : Organic + community
  Paid : Ads + targeting
  Measure : Tracking + reporting
  Improve : Testing + iteration
  Portfolio : Playbook + campaign plan
```

```
timeline
  title Freelancing & Personal Branding
  Position : Niche + offer
  Brand : Portfolio + profile
  Sell : Outreach + sales process
  Protect : Pricing + contracts
  Portfolio : Brand kit + templates
```

```
timeline
  title Agency Building
  Offer : Packaging + SOPs
  Acquire : Lead channels + pipeline
  Deliver : Ops + QA + reporting
  Scale : Team + partnerships
  Portfolio : Agency playbook + system
```
